Crestron RL™
Brings Microsoft Lync into your conference room

Finally, a full-featured Microsoft® Lync® system for conference rooms, from the leader in enterprise automation and management systems

Microsoft Lync® provides a consistent, single client experience for presence, instant messaging, voice, video and a great meeting experience. Crestron RL™ extends the Lync experience to the conference room so groups can communicate and collaborate in real time regardless of physical location. Crestron RL combines the intuitive room control solutions of Crestron with the full collaboration features of Microsoft Lync 2013.

And, Crestron RL is incredibly easy to use. Anyone can walk into a room and start a video conference, complete with shared content and interactive whiteboarding, with the touch of a button. Using any mobile device or network connected computer, remotely join the conference to communicate, share documents, and collaborate with partners, colleagues and clients.

Best of all, there are no strings attached. Crestron RL provides a turnkey unified collaboration solution right out of the box and requires no additional licenses, maintenance fees, or MCUs.

- Create the most productive group meeting environment in seconds from a single intuitive user interface

- Access Lync meetings from a high resolution 10" table top touch screen

- Share local and remote desktops, display presentations, or annotate on a virtual whiteboard

- Simply type participants' names to add to meeting

- Control lights, shades, and room climate with built-in Crestron intelligence

- Manage Crestron RL deployment across enterprise using Crestron Fusion™ management suite

CRESTRON
